Leetcode
Kanpur, Uttar Pradesh, India

Professional Summary

Computer Science undergraduate specializing in Artificial Intelligence with hands-on experience in MERN stack development and web applications. Strong foundation in Data Structures & Algorithms, DBMS, Object-Oriented Programming, and SQL. Skilled in React.js, Node.js, Express.js, MongoDB, and REST APIs with a strong interest in software engineering and scalable application development.

Education

B.Tech CSE (AI), Pranveer Singh Institute of Technology, Kanpur, UP 2023 – Pursuing
79.6% (till 5th semester)

Intermediate (CBSE), Shri Ram Public School, Kanpur, UP 2023
64.6%

High School (CBSE), Shri Ram Public School, Kanpur, UP 2021
82.8%

Technical Skills

Languages: Python, C/C++, Java (Basic)
Frontend: HTML5, CSS3, JavaScript (ES6+), React.js
Backend: Node.js, Express.js, REST API Development
Databases: MongoDB, MySQL, SQL
Core CS: Data Structures & Algorithms, DBMS, Object-Oriented Programming (OOP)
Tools & Platforms: Git, GitHub, VS Code, Postman, Cloudinary, Google Colab
Soft Skills: Problem Solving, Leadership, Team Collaboration
Concepts: SDLC, Agile Methodology, Version Control

Experience

Associate Technical Lead Intern — PaintBharat Co. Jan 2026 – Present

- Leading the technical team for the company website development project.
- Defined the technology stack, development roadmap, and UI/UX planning strategy.
- Coordinating project execution using Agile practices and Git-based workflows.

Projects

AtomQuest – Performance Management Portal Apr 2026 – May 2026
MERN Stack, REST APIs

- Developed a MERN-stack performance management portal during AtomQuest Hackathon.
- Implemented role-based access control and employee approval workflows.
- Built responsive React.js interfaces integrated with REST APIs.

Kanban Board Jan 2026 - Feb 2026
HTML, CSS, JavaScript, Local Storage

- Developed a drag-and-drop Kanban board for visual task management and workflow tracking.
- Implemented task editing, priority management, search filtering, and localStorage-based persistence.
- Built a responsive user interface with interactive task movement across workflow stages.

Driver Drowsiness Detection System Sep 2025 – Dec 2025
Python, OpenCV, TensorFlow/Keras

- Built a real-time driver monitoring system achieving 95% accuracy.
- Utilized OpenCV, MediaPipe, and TensorFlow for facial landmark detection.
- Implemented automated alert generation based on eye-state analysis.

Certifications & Achievements

Participated in AtomQuest Hackathon. May 2026
IBM Machine Learning Professional Certificate – Coursera Apr 2026
Software Engineer Certification – HackerRank Mar 2026
Solved 50+ Data Structures & Algorithms problems on LeetCode.
