Leetcode
Kanpur, Uttar Pradesh, India

Professional Summary

Computer Science undergraduate specializing in Artificial Intelligence with hands-on experience in full-stack web development and software engineering. Quick learner with a strong problem-solving mindset and passion for building impactful software solutions. Available for immediate joining and open to relocation.

Education

B.Tech CSE (AI), Pranveer Singh Institute of Technology, Kanpur, UP 2023 – Pursuing
79.6% (till 3rd year)

Intermediate (CBSE), Shri Ram Public School, Kanpur, UP 2023
64.6%

High School (CBSE), Shri Ram Public School, Kanpur, UP 2021
82.8%

Technical Skills

Languages: Python, C/C++, Java (Basic)
Frontend: HTML5, CSS3, JavaScript (ES6+), React.js
Backend: Node.js, Express.js, REST API Development
Databases: MongoDB, MySQL, SQL
Core CS: Data Structures & Algorithms, DBMS
Tools & Platforms: Git, GitHub, VS Code, Postman, Cloudinary, Google Colab
Soft Skills: Problem Solving, Leadership, Team Collaboration
Concepts: SDLC, Agile Methodology, Version Control

Experience

Associate Technical Lead Intern — PaintBharat Co. Jan 2026 – July 2026

- Led the development of the company website to strengthen its online presence.
- Defined the project architecture, technology stack, and development roadmap.
- Guided the development team and coordinated industry-level project execution for timely delivery.

Projects

AtomQuest – Performance Management Portal Apr 2026 – May 2026
MERN Stack, REST APIs

- Designed a performance management portal to streamline employee evaluation and approval workflows.
- Integrated role-based authentication, REST APIs, and secure CRUD operations using the MERN stack.
- Simplified manual record management through centralized dashboards and automated workflows.

Kanban Board Jan 2026 – Feb 2026
HTML, CSS, JavaScript, Local Storage

- Designed a Kanban board to organize tasks and improve workflow management.
- Added drag-and-drop, task editing, search, priority filters, and Local Storage support.
- Enabled persistent task management with a responsive and interactive interface.

Driver Drowsiness Detection System Sep 2025 – Dec 2025
Python, OpenCV, MediaPipe, TensorFlow

- Designed a real-time system to detect driver drowsiness and improve road safety.
- Leveraged OpenCV, MediaPipe, and TensorFlow for facial landmark and eye-state detection.
- Achieved 95% detection accuracy with real-time fatigue alerts.

Certifications

- IBM Machine Learning Professional Certificate – Coursera Apr 2026
- Software Engineer Certification – HackerRank Mar 2026

Achievements

- Qualified the NMG Technologies Qualifier Round (On-site: Gurugram). Jun 2026
- Solved 50+ Data Structures & Algorithms problems on LeetCode.
